PROFESSIONAL SUMMARY

Computer Science undergraduate with backend engineering experience building fintech infrastructure using Django and Django REST Framework. Developed invoice management, automated payouts, merchant rule engines, payment gateway integrations and virtual bank account workflows. Experienced in leveraging Claude Code for architecture exploration, debugging, refactoring, documentation, and code reviews to improve engineering productivity.

EDUCATION

Dr. APJ Abdul Kalam Technical University

B.Tech in Computer Science & Engineering

2023–2027

CGPA: 7.52

EXPERIENCE

Backend Software Engineer Intern – Playto

Feb 2026 – Present

- Built a complete Invoice Management System enabling merchants to create, manage and track invoices.
- Worked with multiple payment gateways including **XPay, Razorpay, PayGlocal, PayU, and PayPal**, contributing to payment integration, transaction workflows, merchant onboarding, and backend payment services.
- Designed a Merchant Rulebook Engine to dynamically select the appropriate payment gateway.
- Automated merchant payouts by replacing spreadsheet-driven workflows with an internal operations platform.
- Integrated Virtual Bank Account payment and reconciliation workflows.
- Built REST APIs, webhook handlers and backend services using Django REST Framework while contributing to the Ops Console frontend.

PROJECTS

PeerPrep – Real-Time Collaborative Coding Platform

React.js, Next.js, Node.js, WebSockets

- Built collaborative coding with real-time synchronization and role-based access.

Spendly – AI-Powered Expense Management Platform

Next.js, Gemini AI, PostgreSQL, Clerk

- Built AI-assisted expense categorisation and analytics dashboard.

Socially – Full-Stack Social Platform

Next.js, Prisma, PostgreSQL

- Implemented posts, authentication, notifications and real-time chat.

SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL

Backend: Django, Django REST Framework, Node.js, Express.js, REST APIs, Webhooks

Frontend: React.js, Next.js, Tailwind CSS

Databases: PostgreSQL, MongoDB

Payments: XPay, Razorpay, PayU, PayGlocal, Virtual Bank Accounts, Payment Gateway Integration

Developer Tools: Git, Codex, Grafana, Postman, Claude Code

AI-Assisted Development: Claude Code, AI-assisted debugging, refactoring, architecture exploration, code reviews.

ACHIEVEMENTS

- Team Leader – Smart India Hackathon 2026 (College Internal Qualifier).
- Participant – Chandigarh University Hackathon.
- Blockchain Bootcamp – Smart Contracts and Decentralized Systems.
